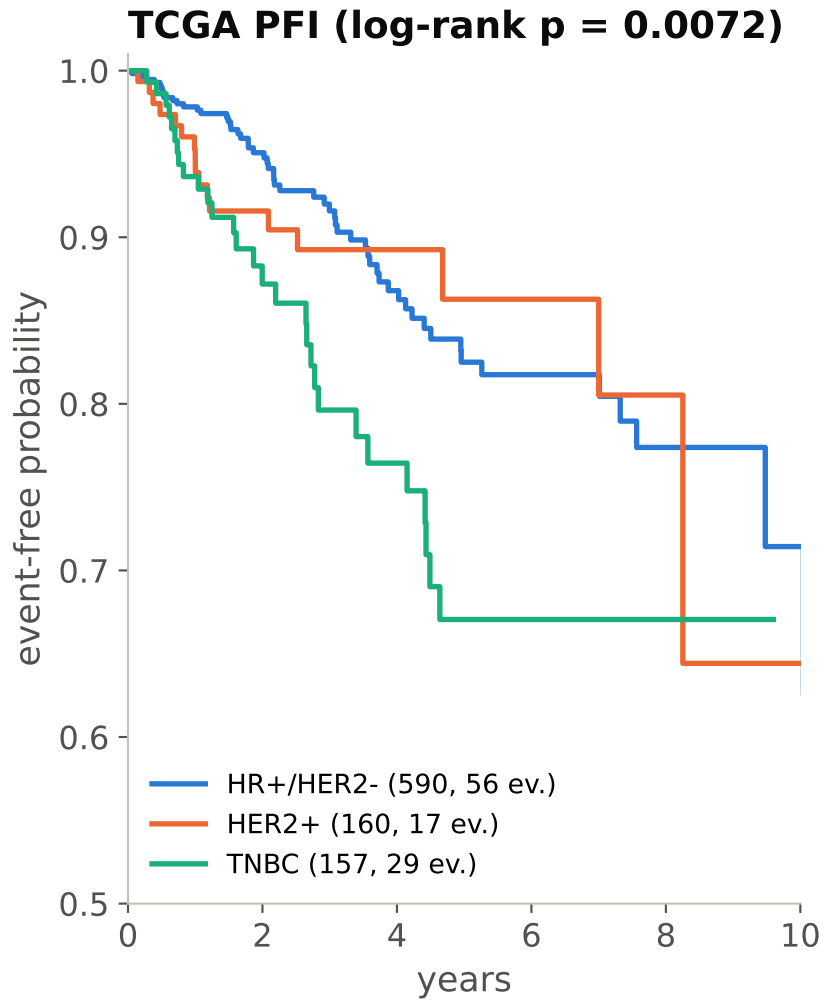
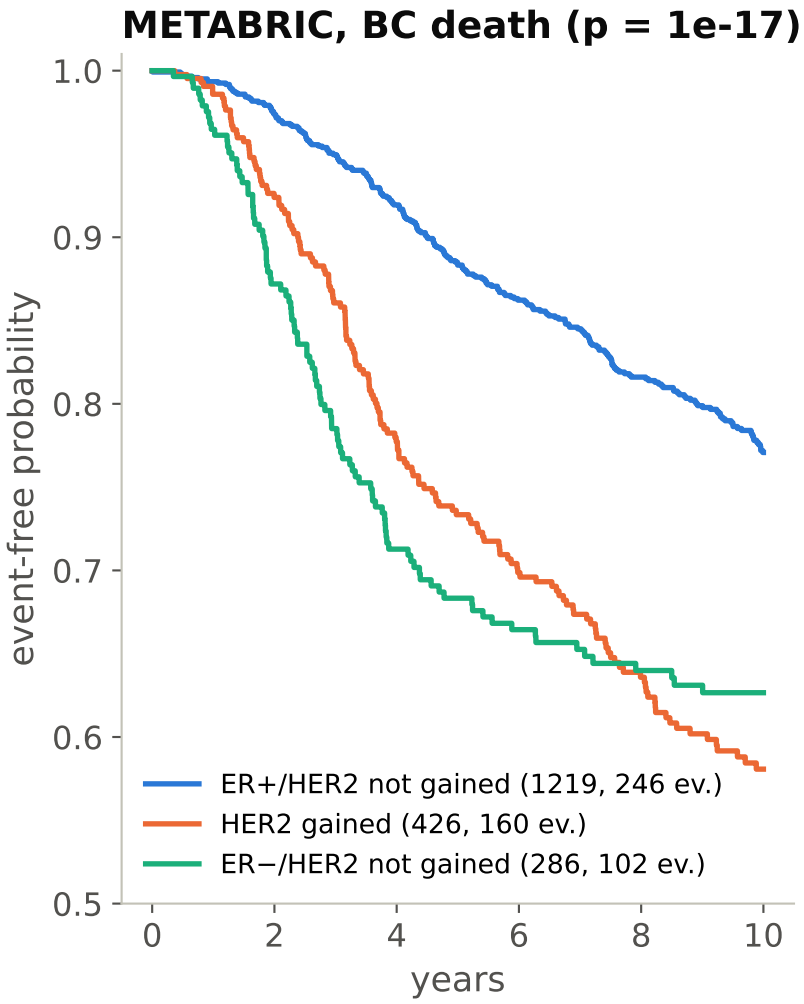
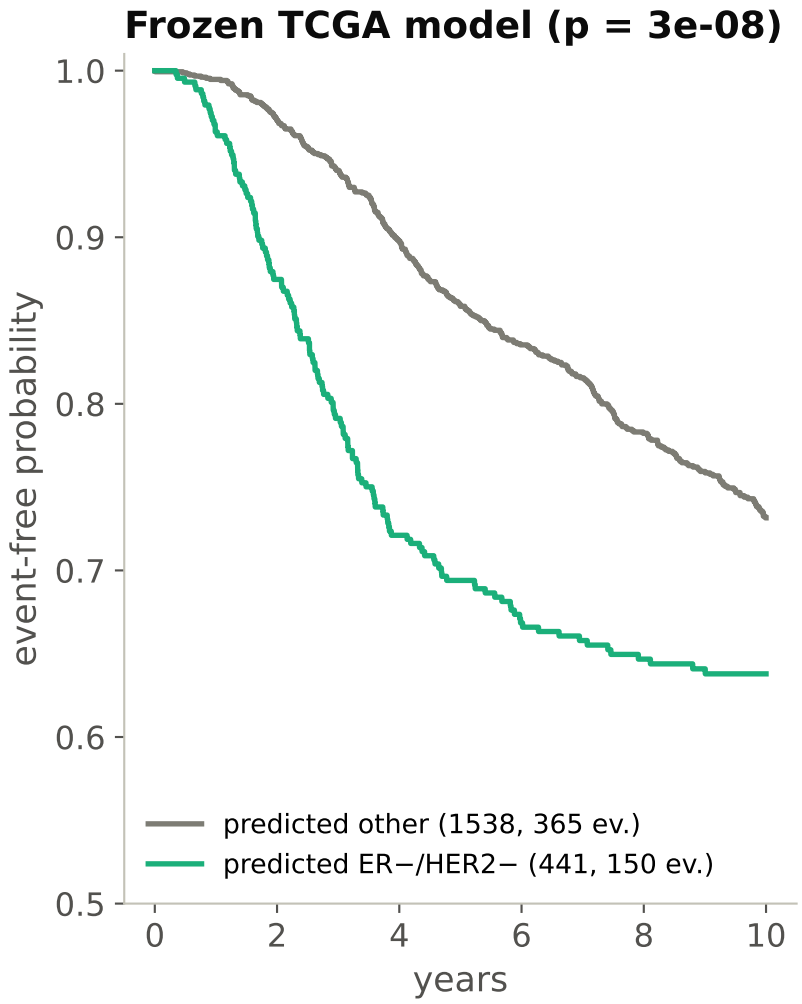
Triple-negative disease relapses early: TNBC PFI HR 2.7 in TCGA, replicated in METABRIC.

METABRIC ER−/HER2− hazard crosses: HR 2.5 in years 0–5, 0.5 in years 5–10.






TCGA Cox PFI ~ group + age + stage: n 884, 100 events, 5 parameters; TNBC HR 2.69 (1.70–4.26), HER2+ 0.98.
METABRIC Cox ~ group + age + grade + size: n 1846, 492 breast-cancer deaths in 10 years; reference ER+/HER2 not gained. PH fails for ER−/HER2− in METABRIC, s
Exploratory; TCGA median follow-up is about 2.4 years.
